WORKBENCHES

The workshop equipment from Lista AG is specifically designed to meet the demands of modern automotive workshops – robust, functional, and modularly expandable. High-quality workbenches, drawer cabinets, and system solutions ensure optimal workflows, maximum organization, and ergonomic working. With durable materials, a well-thought-out storage concept, and customized planning, Lista offers a long-lasting furnishing solution that visibly enhances efficiency and professionalism.

STORAGE LIFTS

Less is more – this clear principle also applies to modern warehousing. Fast access and minimal space requirements give your company a clear competitive edge. Automatic storage lift systems from LISTA help make your processes even more efficient. They ensure optimized space utilization, time savings, inventory control, and ergonomics. Variable in height, width, and load capacity, LISTA lift systems can be flexibly adapted, controlled, and networked to meet your specific requirements. You benefit from proven LISTA quality, expertise, and service from one of the world's leading system providers – and always choose a reliable solution you can trust.

SHELVING SYSTEMS

Our universal shelving system L1006 impresses with its versatile usability, high load capacity, and easy assembly. Thanks to its well-designed plug-in system, it can be flexibly expanded and adapted to individual storage needs. Robust steel components and durable corrosion protection ensure a safe and long-lasting storage solution.

LOCKERS

Lista's locker cabinets stand for maximum stability, well-thought-out functionality, and long-lasting quality. With individually configurable interior fittings and a robust sheet steel construction, they meet the highest demands in industry, workshops, and public institutions. Modern design, ventilation concepts, and a wide range of colour options also ensure an attractive appearance and optimal room integration.

TYRE STORAGE

The tyre storage systems from Lista AG offer a safe, space-saving, and clearly arranged solution for storing tyres and wheels. Thanks to their flexible modular design, a wide variety of tyre sizes can be optimally accommodated.

OUR SERVICE

From consulting ...

Professional consulting is the foundation of every successful solution. LISTA has experienced specialists for a wide range of industries. Thanks to extensive expertise in workshop organization, material flow and efficient process design, we develop practical concepts that optimize workflows and sustainably increase productivity. From the initial on-site analysis to the final implementation, we support our customers as reliable and solution-oriented partners.

... to planning ...

Using the latest 3D planning tools, LISTA develops tailor-made facility concepts that perfectly combine functionality, efficiency and design. Our experts create precise 2D and 3D layouts that provide maximum transparency and planning reliability already during the planning phase. Photorealistic renderings allow projects to be visualized in detail even before implementation, enabling well-informed decisions. The result: well thought-out and cost-efficient solutions – individually designed and professionally implemented in proven LISTA quality.

... all the way to installation!

Our experienced project managers coordinate all processes on schedule and ensure smooth implementation – from detailed planning to final handover. Professional installation by trained specialists guarantees the highest quality, precision and safety. This ensures that your facility is not only perfectly planned but also efficiently realized – and of course we remain at your side afterwards as well.

Rendering

Reality

FROM IDEA TO REALITY

1 Project Kick-off – The foundation for successful implementation

During a joint kick-off meeting with our LISTA segment specialist, the key framework conditions of the project are defined. We analyse the structural conditions, coordinate schedules and review existing work processes. From the very beginning, this creates transparency, planning reliability and a clear basis for efficient implementation.

2 Concept Planning – From idea to a well-thought-out solution

Our LISTA segment specialist brings the floor plan to life and develops an initial concept proposal tailored to all customer requirements. In-depth industry know-how and extensive process expertise are deliberately incorporated into the planning process. The results are compiled in a structured digital project file and submitted to the customer for review and coordination.

3 Detailed Discussion – Fine-tuning towards the optimal solution

Following internal coordination with all relevant stakeholders, customer feedback is incorporated during a further project meeting. Adjustments, additions and individual requirements are specifically integrated and jointly reviewed. This structured coordination process continues until a configuration perfectly tailored to the requirements is achieved.

4 Detailed Planning – Precision down to the last detail

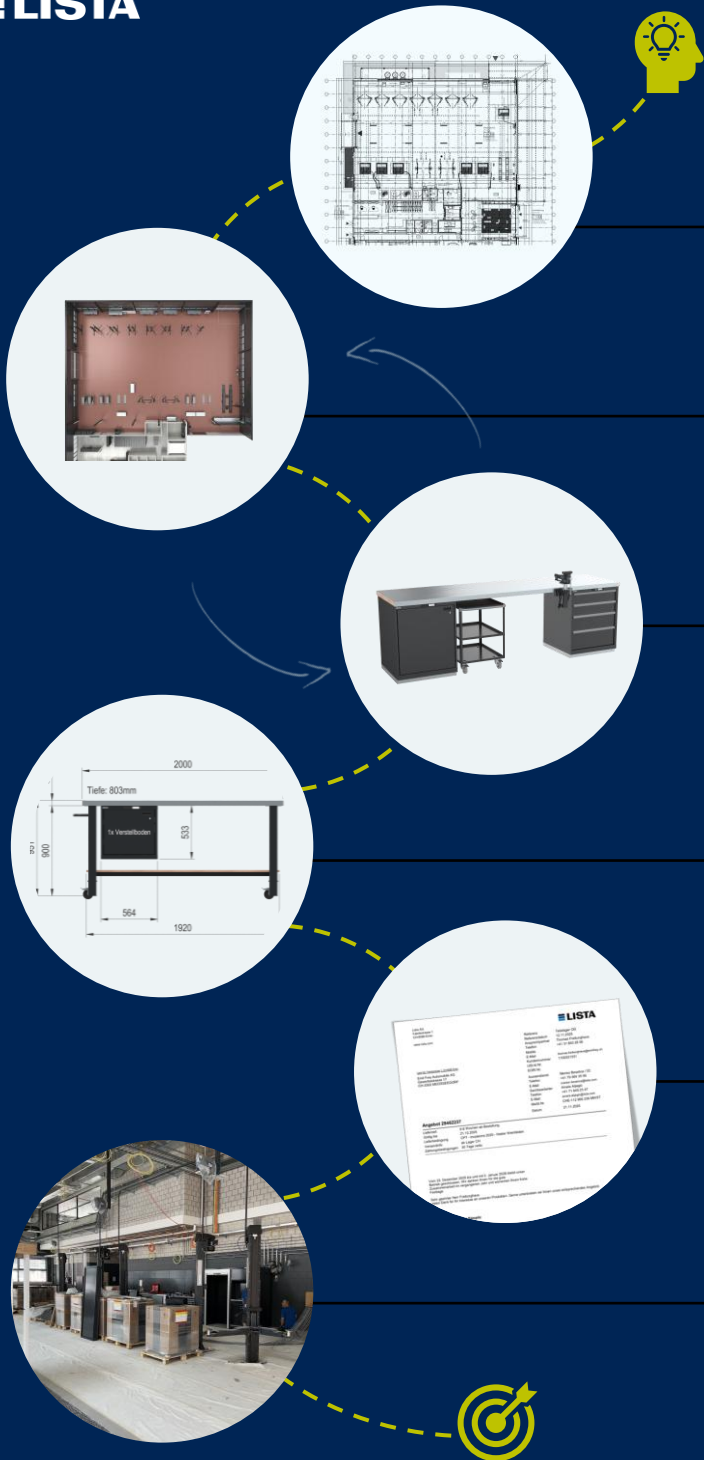

Once the final solution has been defined, the binding elaboration of the detailed planning begins. Our LISTA segment specialist prepares precise dimension drawings for all components used and verifies their optimal integration into the building environment. For existing buildings, on-site measurements and careful collision checks with existing installations are carried out.

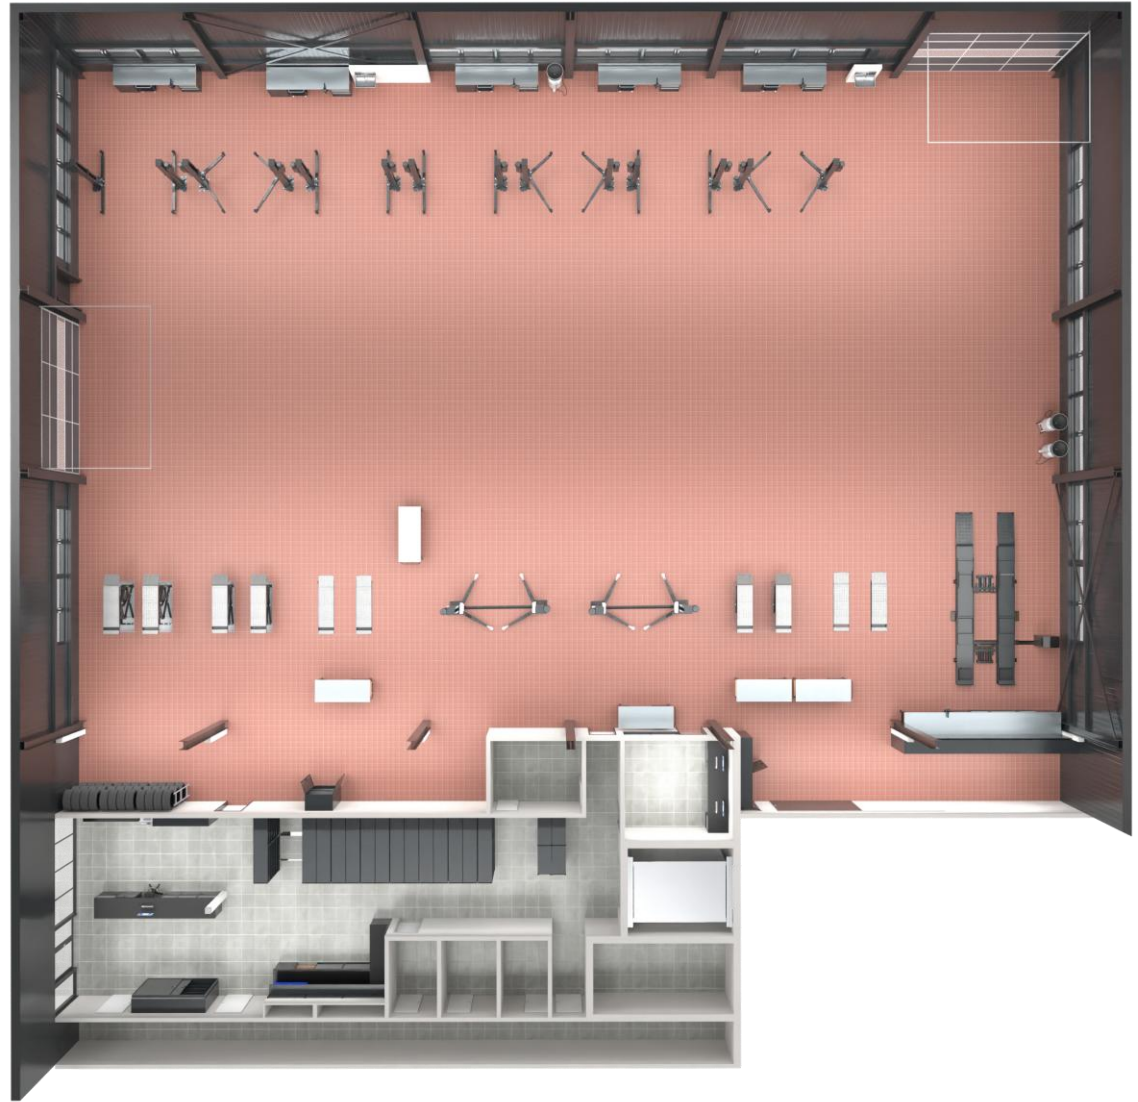

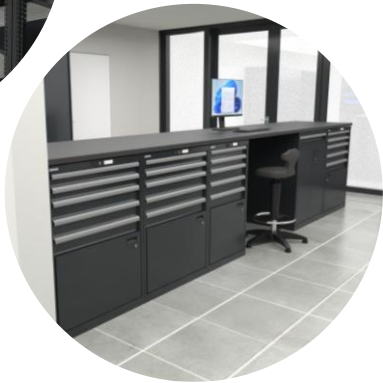

5 Quotation – Transparency and planning reliability

Once all technical details have been clarified, we prepare a comprehensive and transparent project quotation. The quotation is based on the final planning and clearly outlines all services provided. This gives you maximum cost transparency and a reliable basis for your investment decision.

6 Production and Installation – Quality through to final handover

A few weeks before delivery, production of your equipment begins at our plants in Erlen (CH) and Bergneustadt (DE). Our project manager supervises the entire process — from the production of the first component to on-time delivery and professional installation on site. This ensures that quality, deadlines and execution meet the highest standards.

SERVICE: THERE FOR YOU ALL OVER THE WORLD

LISTA is there for you: on several continents, in many different locations. In addition to our two production sites in Erlen (Switzerland) and in Bergneustadt (Germany), we also look after and advise our customers through our international sales branches in Europe and China. A close-knit network of retail partners tops off the service that we offer.

ORDERING AND CONTACT

Do you need further information, personal advice or would like to order a product? We look forward to hearing from you.
